About this training

The State of Nevada has selected ORION Damage Assessment Solution by IT Futurity as the approved statewide application for disaster preparedness, damage assessment and recovery. This training is geared toward emergency managers, first responders, public works personnel, inspectors and CERT members.

Upon completion of this training, participants will have knowledge of:

- Conducting a residential, business, public/infrastructure and agriculture property assessment.

- Understanding the ORION dashboard and mobile app.

- A thorough understanding of the field collected data and administrative and project management functions in the ORION dashboard.

- Creating a public infrastructure pre-plans/pre-loading and how to utilize the ORION Solution to assist in your public assistance projects.

- Performing several assessments using their own mobile devices with confidence and success.

IMPORTANT: Attendees must bring their mobile devices for this training.

This training is funded through a FFY2015 Homeland Security grant, Disaster Recovery Project.
